

Maziar Kianimoghadam Jouneghani

Last Updated: August 2026

NLP / Computational Linguistics Researcher | Turin, Italy

maziar.kianimoghadam@edu.unito.it | maziarkiani.github.io | [ORCID](#) | [Google Scholar](#)

Research Interests

Multilingual and Cross-Cultural NLP, Computational Social Science (CSS), Information Disorder, Human-in-the-Loop AI (HITL), Explainable AI (XAI), In-Context Learning (ICL).

Education

University of Turin

Turin, Italy | Oct 2023 – Jul 2026

Master's Degree in Language Technologies and Digital Humanities

Final Grade: 106/110

Thesis: "Culturally Adaptive Explainable LLM Assessment for Multilingual Information Disorder"

Supervisors: Prof. Viviana Patti (Supervisor), Dr. Marco Antonio Stranisci (Co-supervisor)

Research Summary: Extended a multilingual baseline study on the InDor corpus to investigate where current LLMs show cultural blindness and produce culturally misaligned outputs in information disorder assessment. Designed and tested a retrieval-based In-Context Learning framework to connect model reasoning to community-annotated exemplars. These exemplars are dynamically retrieved through semantic similarity at inference time from an encoded version of the corpus. Evaluated across Persian and Italian subsets using a combination of automated metrics and native-speaker human evaluation on three tasks of classification, span detection and rationale generation. Shahrekord University

Shahrekord, Iran | Sep 2013 – Feb 2017

Bachelor's Degree in English Language Translation

Final Grade: 17.07/20

Academic Focus: Linguistics and Translation Studies.

Publications

Published

- Gemelli, S., et al. "Beyond Fake News Detection: A Community-Based Study of the Multicultural Nature of Information Disorder." *Proceedings of the Fifteenth Language Resources and Evaluation Conference (LREC 2026)*. Co-author: **Jouneghani, M. K.** [\[Link\]](#)

This work presents the InDor corpus, a community-developed multilingual dataset of 4,155 news articles annotated for information disorder in English, Farsi, Italian, and Russian, studying how culture and language shape its perception, and provides evaluations of LLaMA 4 Maverick and Mixtral-8x22B on the corpus. I was a member of the core research team that built the corpus: I sourced manipulative media reports, coordinated social media outreach for community data collection, and participated in the annotation of the Farsi and English subsets. This dataset and these baseline findings are the empirical foundation of my thesis.

- Jouneghani, M. K.** "MKJ at SemEval-2026 Task 9: A Comparative Study of Generalist, Specialist, and Ensemble Strategies for Multilingual Polarization." *Proceedings of the 20th International Workshop on Semantic Evaluation (SemEval-2026)*. **System ranked 2nd in the Farsi (Persian) and Burmese language tracks of Subtask 1.** [\[Link\]](#)

Solo-authored system paper for multilingual polarization detection across 22 languages, comparing generalist, specialist, and ensemble techniques assigned per language. The final model and setting were chosen based on development performance, testing between 4 and 13 candidate models or ensemble configurations per track.

- Jouneghani, M. K.** "Culturally Adaptive Explainable LLM Assessment for Multilingual Information Disorder: A Human-in-the-Loop Approach." Peer-reviewed, accepted and presented at the 1st Workshop on Information Disorder (InDor26), at LREC 2026 (Non-archival). [\[arXiv\]](#) [\[Proceedings\]](#)

Solo-authored paper proposing a Human-in-the-Loop framework to align LLMs' assessment of information disorder with native-speaker rationales. This paper is the initial idea of my thesis framework, submitted as an ongoing study. My thesis is the application and a pilot test of this study.

Under Review

- Piva, H. C., Ashraf, S., **Jouneghani, M. K.**, Longo, A., Damiano, R., Flek, L., Stranisci, M. A. "Conspiracy Frame: A Semiotically-Driven Approach for Conspiracy Theories Detection." Under review. Preprint available on [\[arXiv\]](#).

Introduces the Conspiracy Frame, a semiotics-derived semantic representation of conspiratorial narratives, and the Con.Fra. dataset of 2,077 Telegram messages annotated at span-level, then tests whether frame-based prompting improves LLM detection of conspiracy theories in- and out-of-domain. I contributed to the annotation process, presented parts of the annotation scheme during the participatory annotation workshop, and authored the related work section.

Academic and Research Experience

aequa-tech, srl

Turin, Italy

NLP Research Intern

Feb 2025 – Jul 2025

- Part of a 12-member international team building the InDor corpus, contributing to different phases of the project: sourcing manipulative media reports, coordinating social media outreach for community data collection, and annotating the Farsi and English subsets.

University of Turin (Department of Psychology)

Turin, Italy

Research Assistant, BIP (Brain Plasticity and Behavior Changes) Group

Sep 2024 – Jun 2025

- Assisted with human-subject experimental sessions across two cognitive studies: participant recruitment, hardware setup, data collection, and preliminary processing of physiological signals (EEG, ECG, EDA, HRV).

Technical and Research Skills

Programming and Tools: Python (data preprocessing, NLP pipeline scripting, evaluation scripts, research prototyping), Hugging Face Transformers, sentence-transformers, scikit-learn, NumPy, pandas, HTML.

NLP Methodologies: Fine-tuning encoder models (e.g., XLM-RoBERTa, mDeBERTa), ensemble strategies, In-Context Learning (ICL), retrieval-based frameworks, Human-in-the-Loop (HITL) workflows, cross-lingual augmentation, model evaluation (LLMs and classifiers).

Data and Linguistic Research: Multilingual dataset curation, annotation workflows, and linguistic analysis.

Languages: English (C2), Persian (Native), Qashqai Turkish (Native), Italian (A2).

Reviewing

Reviewer, 20th International Workshop on Semantic Evaluation (SemEval-2026), 2 papers

Professional Experience

Digital Marketing & SEO Specialist (*Various Roles*)

2020–2023

Worked in SEO, web content, and digital marketing roles across multiple organizations before pursuing my Master's degree.
